DETAILED ACTION

Applicants' response, which included cancellation of claim 21, addition of new claims 23-24 and amendment to claims 14, filed on 11/22/2004, is made of record.

Claims 14-20 and 23-24 are now pending.

In view of applicants' response, all 112 rejections and double patenting rejection of claim 21 are obviated. However, the following remains.

Information Disclosure Statement

References cited in the Supplemental Information Disclosure Statement filed on 12/30/2004, are made of record except for Kubunshi Kagaku reference for which no English language abstract provided.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashley et al. J. Chem. Soc. 4525-4532, 1960.

Ashley et al. teaches disubstituted triazines, which include compounds claimed in the instant claim. See compound shown on page 4530, second paragraph.

This rejection is same as made in the previous office action.

Applicants' argument seems to indicate that the said claims were amended to obviate this rejection. However, claims 14 and 16 as presented do not show any such amendment.

Hence, this rejection is maintained.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14-20 and 23-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,638,932. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter embraced in the instant claims overlap with the subject matter embraced in the US patent 6,638,932. Note the instant genus of formula I, its composition and method of use to treat HIV, is also generically claimed in the US patent 6,638,932.

This rejection is same as made in the previous office action except that cancelled claim 21 is excluded and newly added claims 23-24 are included in this rejection. Applicants' argument to overcome this rejection is deemed as not persuasive.

First of all, applicants have not shown that instant claims are not obvious over claims of US 6,638,932. The traversal appears to argue the withdrawal made to newly added claims as not originally presented in parent application.

Secondly, the claims withdrawn in the parent application were not originally presented but afterwards which would require additional search as they had core compounds, which were not searched. Whereas, the parent application 09/831,808, the aminotriazine core can be appended to variable core at any position available and the variables a^1 , a^2 , a^3 and a^4 in contiguous position while in the instant claims they are not. Instant claims requires b^1 , b^2 and b^3 , b^4 be not contiguous and must have at the position to the attachment of aminotriazine, a cyano substituent. Although there are some overlaps, these claims presented new genus of compounds and were withdrawn in the parent application. Applicants had not traversed the same.

Hence, this rejection is deemed as proper and is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
